

Stretcher scale KERN MWS-L

Stretcher scale with a low overall height for easy access – with EC type approval class III and approval for medical use

Features

- Verification class III (verification is optional)
- Approved as a medical device according to 93/42/EEC
- **1** Due to its large dimensions and large weighing range, it is especially suitable for weighing immobile patients on stretchers or wheelchairs as well as obese patients
- Large steel weighing plate with non-slip and wear-resistant surface
- Secure and non-slip positioning with height-adjustable rubber feet
- Level indicator to level the balance precisely
- Hold function:
When patients do not stand, sit or lie completely still, a stable weight is calculated using an average weight and this is then "frozen". This means that you have sufficient time to attend to the patient first and then take the weight reading in peace
- BMI function to determine underweight/normal weight/surplus weight
- **2** The scale can be easily transported using 2 rollers and 2 handles and does not require much storage space

- **3** Display device with two magnets on the back, ideal to fix it to metallic surfaces, e.g. to the weighing plate during transportation
- Battery- or mains-powered, rechargeable battery operation optional
